## WE HAVE LOG REACH COIL!

Advanced Coil Tubing is pleased to offer three high capacity coil strings along with a 3600m E-coil string. This will assist you in all of your extended reach applications. Including drilling, plugs setting, perforating, clean outs etc...

### Sizes Available:

1. 3600 meters wire line specific coil (E-coil)
2. 31.8mm x 3600 meters heavy wall
3. 38.1mm x 3600 meters heavy wall
4. 44.5mm x 3600 meters heavy wall

### Truck Specifications:

- Large capacity reels for extended reach applications
- 35 MPa wellhead working pressure
- Nitrogen-pressured accumulator for hydraulic backup supply
- Remote BOP control system
- 31.8mm-44.5mm tubing sizes
- Quick change reel system
- Infinite depth rate control
- Acquiring Real-time data acquisition and tubing fatigue analysis software
- Compliant for all well classes (Class 1 – III)
- Hydraulic Injector Tilt safety feature

### ADVANCED ADVANTAGES:

Advanced Coiled Tubing Unit's are efficient, versatile, and capable of delivering virtually any coiled tubing operation at shallow, medium, and deep depths. Each self-contained unit can be rigged-up quickly, thereby reducing time on location. Replaceable work reels provide the ability to utilize multiple tubing sizes and lengths in minimal time and permit travel during road bans. All Conventional units are equipped with real-time data acquisition and tubing fatigue analysis software, enabling clients to observe actual rates, pressures, and remaining tubing life.
